POST-DISASTER NEEDS ASSESSMENTS

As in any other architectural project, post-disaster reconstruction revolves around the needs of the occupants and users of the built environments, as well as the needs of the communities and cities decimated by disaster. It requires us to take into account cultural, social and environmental contexts.

Post-Disaster Reconstruction and the Critical Role of ...

Experiences from post-emergency situations also suggest that crises can advance disability-inclusive development goals. They can provide opportunities to challenge prejudice and discrimination and 'build back better' by ensuring comprehensive accessibility in post-emergency reconstruction (Mitchell & Karr, 2014, pp. 3-4).

Disasters and conflict - GSDRC

Children tend to react to disaster and traumatic events based on their past experiences and what they know of the current situation. Children with disabilities may require extra support from an adult to help them cope with disaster or traumatic events.

Resources Specific to Emergency/Crisis and Disaster ...

After a disaster, children may develop symptoms of anxiety, depression, and post-traumatic stress disorder. Mental health plays an important role in physical health, school performance, behavior, and long-term quality of life. Therefore, it is important to keep children physically and mentally safe during and after a disaster.

Helping Your Child Cope with a Disaster | CDC

Disaster response is the second phase of the disaster management cycle. It consists of a number of elements, for example; warning/evacuation, search and rescue, providing immediate assistance,
